

ELECTRIQ POWER

# The App

## YOUR POWER IN YOUR HANDS

Manage your home's entire energy ecosystem from anywhere in the world on any device.

v041921

The Electriq Power App provides analytics and insights on your energy production, consumption, and storage data all in one intuitive, cloud-based application for your computer or phone. Our proprietary optimization algorithms use multiple factors such as consumption, solar production, utility rates and weather to optimize your home's energy.

Here are some of the features:

### REAL-TIME POWER FLOW

See live readings from your solar panels (DC-Coupled only), PowerPod 2, home and the grid, so you instantly know where your energy is coming from and where it's going.

### MODES OF OPERATION

The App allows you to manually or automatically change system modes to maximize your PowerPod 2's energy and cost savings.

[ Real-Time Power Flow View ]

[ Timeline View ]

### POWER & ENERGY TIMELINE

See daily graphs of your energy generation and consumption, and better understand your home's electrical activity.

### CUSTOM REPORTING

View daily, weekly, monthly, and yearly reports of your energy usage, as well as peak power consumption heat maps.

[ System Modes View ]

## THE POWER TO CONTROL YOUR POWER

Choose between three different modes to optimize for energy affordability, sustainability or resiliency and the intelligent software automates the rest. Plus, the ability to set your area's specific high tariff periods ensures battery power is used when utility costs are highest.

### BACKUP

This mode keeps your battery charged at 100% to maximize coverage during the event of a power outage.

### SELF-SUPPLY

Minimize or eliminate grid usage by storing excess solar energy and using that energy when solar isn't producing.

### TIME-OF-USE

Simply set your area's high tariff schedule and this mode will ensure you use battery power when utility prices are highest.

[ Fire Threat Notification ]

"Thanks to my PowerPod and the Electric Power App, my home stayed powered through our city's planned outage. The App automatically switched our system to Backup Mode and ensured we had a full charge before the grid went down. Our home was the envy of the neighborhood."
